5th International Conference on Lactoferrin / 5e Conférence internationale sur la lactoferrine
Structure, Function, and Applications / Structure, fonction et applications

A.B. Schryvers and H.J. Vogel Introduction v

Jeremy H. Brock The physiology of lactoferrin 1

Christina T. Teng Lactoferrin gene expression and regulation: an overview 7

Li-Herng Eric Liu, Wesley Gladwell, and Christina T. Teng Detection of exon polymorphisms in the human lactoferrin gene 17

Zhiping Zhang and Christina T. Teng Methoxychlor stimulates the mouse lactoferrin gene promoter through a GC-rich element 23

Edward N. Baker, Heather M. Baker, and Richard D. Kidd Lactoferrin and transferrin: Functional variations on a common structural framework 27

Maria O. Pulina, Elena T. Zakharova, Alexei V. Sokolov, Mikhail M. Shavlovski, Mikhail G. Bass, Kirill V. Solovyov, Vladimir N. Kokryakov, and Vadim B. Vasilyev Studies of the ceruloplasmin–lactoferrin complex 35

Paola Rossi, Francesco Giansanti, Alberto Boffi, Maria Ajello, Piera Valenti, Emilia Chiancone, and Giovanni Antonini Ca^{2+} binding to bovine lactoferrin enhances protein stability and influences the release of bacterial lipopolysaccharide 41

Hans J. Vogel, David J. Schibli, Weiguo Jing, Elke M. Lohmeier-Vogel, Raquel F. Epand, and Richard M. Epand Towards a structure–function analysis of bovine lactoferricin and related tryptophan- and arginine-containing peptides 49

Morten B. Strøm, Bengt Erik Haug, Øystein Rekdal, Merete L. Skar, Wenche Stensen, and John S. Svendsen Important structural features of 15-residue lactoferricin derivatives and methods for improvement of antimicrobial activity 65

Yasushi A. Suzuki and Bo Lönnerdal Characterization of mammalian receptors for lactoferrin 75

Rong-Hua Yu and Anthony B. Schryvers Bacterial lactoferrin receptors: insights from characterizing the *Moraxella bovis* receptors 81

Woan-Sub Kim, Tetsuya Tanaka, Haruto Kumura, and Kei-ichi Shimazaki Lactoferrin-binding proteins in *Bifidobacterium bifidum* 91

Pauline P. Ward, Sonia Uribe-Luna, and Orla M. Conneely Lactoferrin and host defense 95

I. Kimber, M. Cumberbatch, R.J. Dearman, D.R. Headon, M. Bhushan, and C.E.M. Griffiths Lactoferrin: influences on Langerhans cells, epidermal cytokines, and cutaneous inflammation 103

M. Tomita, H. Wakabayashi, K. Yamauchi, S. Teraguchi, and H. Hayasawa Bovine lactoferrin and lactoferricin derived from milk: production and applications 109

Elizabeth J. Dial and Lenard M. Lichtenberger Effect of lactoferrin on *Helicobacter felis* induced gastritis 113

Maria Ajello, Rita Greco, Francesco Giansanti, Maria Teresa Massucci, Giovanni Antonini, and Piera Valenti Anti-invasive activity of bovine lactoferrin towards group A streptococci 119

Francesco Giansanti, Paola Rossi, Maria Teresa Massucci, Dario Botti, Giovanni Antonini, Piera Valenti, and Lucilla Seganti Antiviral activity of ovotransferrin discloses an evolutionary strategy for the defensive activities of lactoferrin 125

Hiroyuki Tsuda, Kazunori Sekine,Ken-ichi Fujita, and Masaaki Iigo Cancer prevention by bovine lactoferrin and underlying mechanisms — a review of experimental and clinical studies 131

ABSTRACTS / RÉSUMÉS

E.N. Baker, B.F. Anderson, H.M. Baker, R.D. Kidd, S.C. Shewry, and C.A. Smith Structural and functional relationships between lactoferrins and transferrins 137

T.P. Singh, S. Sharma, S. Yadav, A. Srinivasan, M. Paramasivam, P. Kumar, and J.A. Khan A structural journey from lactoferrins to transferrins: Questions answered and answers questioned? 137

J.A. Khan, P. Kumar, M. Paramasivam, S. Sharma, A. Srinivasan, and T.P. Singh Structure of camel apo-lactoferrin at 2.6 Å resolution and structural basis of its dual role as a transferrin-cum-lactoferrin 138

J.A. Khan, P. Kumar, A. Srinivasan, and T.P. Singh Protein intermediate trapped by the simultaneous crystallization process: Crystal structure of an iron-saturated intermediate in the Fe^{3+} binding pathway of camel lactoferrin at 2.7 Å resolution 138

P. Kumar, S. Yadav, and T.P. Singh Structure of equine apo-lactoferrin at 3.2 Å resolution using crystals grown at 30°C 139

H.M. Baker, R.D. Kidd, B.F. Anderson, I. Ivanovic, H.R. Faber, and E.N. Baker Crystal structure of a form of human apo-lactoferrin with both lobes open points to the importance of conformational dynamics in solution 139

E. Harada, Y. Araki, J.R.M. Talukder, and T. Takeuchi Evidence for transfer of lactoferrin and transferrin into cerebrospinal fluid via blood circulation in suckling neonatal animals 140

R.E.W. Hancock Cationic antimicrobial peptides 140

H. Vogel Structural features of lactoferricin 141

T.P. Singh and S. Sujata A novel proteolytically generated lactoferrin fragment that inhibits microbial proteinases may be an ammunition of lactoferrin and growth hormone receptor to protect themselves from deadly proteinases found in nature 141

D. Headon Recombinant human lactoferrin produced in *Aspergillus* 142

H. Kuwata, K. Yamauchi, S. Teraguchi, and H. Hayasawa Metabolic fate of ingested lactoferrin in adult rats 142

H. Morita, Y.-C. Yoo, W.-S. Kim, T. Tanaka, H. Kumura, and K. Shimazaki The detection of lactoferrin receptor on Jurkat - human lymphoblastic t cell line 143

H. Sasaki, M. Yamaguchi, Y. Nakamura, T. Takahashi, T. Yajima, and T. Kuwata Lactoferrin binds to and is incorporated into cells when it suppresses the LPS-induced production of TNF — by macrophages 143

R. Sato, E. Kato, Y. Miyazaki, H. Tatesawa, J. Sato, H. Hayasawa, and Y. Naito Regulatory effects of bovine lactoferrin on neutrophil functions in cats 144

I. Kimber, M. Cumberbatch, R.J. Dearman, D.R. Headon, M. Bhushan, and C.E.M. Griffiths Mechanisms of inhibition of allergen induced inflammatory responses by lactoferrin 144

M. Ceregrzyn, T. Kamata, and A. Kuwahara The effect of lactoferrin on endotoxemia-induced alteration on gastrointestinal transit in mice 145

H. Wakabayashi, N. Takakura, H. Kuwata, K. Yamauchi, S. Teraguchi, and H. Hayasawa Analysis of leukocyte population changes in lactoferrin-fed mice 145

M. Inoue and K. Kawa Lactoferrin and gut GVHD 146

T. Kuhara and H. Hayasawa Enhanced production of IL-18 in intestinal epithelium and antiallergic effect of orally administered bovine lactoferrin 146

M. Ceregrzyn, T. Yajima, and A. Kuwahara The effect of lactoferrin on gastric fundus contractility in endotoxemic mice 147

H. Yamaguchi Potential role of bovine lactoferrin in the treatment and prevention of fungal infections 147

M. Tomita, H. Wakabayashi, K. Yamauchi, S. Teraguchi, and H. Hayasawa Bovine lactoferrin and lactoferricin derived from milk: Production and applications 148

I. Nakamura, T. Tanaka, H. Kumura, H. Shiono, K. Shimazaki, and Y. Yagi Expression of recombinant bovine lactoferrin and its N-lobe in insect cells 148

K. Vahtola, R. Isomäki, L. Myllykoski, T. Kutila, and R. Keiski Separation of lactoferrin from cheese whey by expanded bed adsorption 149

H. Wong and A.B. Schryvers Interaction of lactoferrin with bacteria 149

B. Lönnerdal and Y.A. Suzuki Characterization of mammalian receptors for lactoferrin 150

H. Wong and A.B. Schryvers Neisserial lactoferrin binding protein A interactions with human lactoferrin 150

K. Noda, A. Aoki, H. Asaki, T. Ogata, K. Yamauchi, and F. Ohashi The effects of bovine lactoferrin on the polymorphonuclear cell function of dolphins 151

K. Ishii, N. Takamura, M. Shinohara, H. Shin, T. Kawafune, Y. Sumino, K. Yamauchi, S. Teraguchi, and H. Hayasawa Short-term effects of orally administered lactoferrin on patients with chronic hepatitis C 151

S. Yasumura, K. Higuchi, Y. Shimizu, T. Yasuyama, A. Watamabe, K. Yamauchi, S. Teraguchi, and H. Hayasawa Effect of bovine lactoferrin in patients with chronic hepatitis B 152

S. Abe, M. Kato, S.T. Okutomi, S. Tansho, and H. Yamaguchi Role of lactoferrin in host defense mechanisms against vaginal candidiasis 152

S. Imreh, Y. Yang, H. Kiss, I. Kholodnyuk, A. Szeles, M. Kost-Alimova, L. Fedorova, and G. Klein Elimination, interruption, or downregulation of lactoferrin in human CHR 3 monochromosomal hybrid or lactoferrin transfectant derived tumors 153

K. Sekine, K. Fujita, M. Degawa, Y. Harada, H. Hayasawa, and K. Tsuda Preventive effects of bovine lactoferrin (bLF) on caffeine enhanced colon carcinogenesis in rats 153

G. Antonini, P. Rossi, A. Boffi, F. Giansanti, P. Valenti, and E. Chiancone Role of Ca^{2+} binding to bovine lactoferrin 154

C.T. Teng Regulation of lactoferrin gene expression by environmental insults 154

Z. Zhang, H. Shi, and C.T. Teng Distinct region of the intestine-enriched Kruppel-like factor (KLF5) interacts with CBP and transactivates mouse lactoferrin gene promoter 155

C. Beard, W. Gladwell, and C.T. Teng Lactoferrin expression in rodent species 155

W. Gladwell, C. Beard, and C.T. Teng The expression of lactoferrin in human and rhesus monkey 156

J.W. St. Geme III, D.R. Hendrixson, J. Qiu, E.N. Baker, and A.G. Plaut Proteolysis by lactoferrin: Insights into mechanism, and substrate specificity 156

W.-S. Kim, H. Morita, T. Tanaka, H. Kumura, and K. Shimazaki Bovine lactoferrin receptor proteins on the *Bifidobacterium bifidum* 157

T. Trif, J.M. Brewer, A. Roseanu, D.M. Vaughan, M. Moisei, and J.H. Brock Liposome-entrapped lactoferrin: Anti-inflammatory efficacy in mice with collagen-induced arthritis 157

E.J. Dial and L.M. Lichtenberger Treatment of *Helicobacter felis*-induced gastritis by lactoferrin 158

K. Otsuki, B. Lönnerdal, and M.P. Sherman Lactoferrin: Bacterial opsonin for macrophages? 158

G. Antonini, M. Ajello, M.P. Conte, L. Seganti, and P. Valenti In vivo study of anti-invasive activity of bovine lactoferrin towards group A streptococcus 159

H. Tsuda, M. Iigo, K. Sekine, M. Tatematsu, S. Fukushima, and G.S. Goldberg Cancer chemoprevention by lactoferrin and analysis of the mechanisms 159

K.I. Fujita, K. Sekine, M. Iigo, and H. Tsuda Possible involvement of Fas (CD95) in inhibition of azoxymethane-induced colon carcinogenesis by bovine lactoferrin in the rat 160

N.M.A. Van Beek, B. Van't Land, H. Meijer, G. Witte, M. Van Rossem, L. M'Rabet, M. Hoijer, and J.J.M. van den Berg The effect of orally administered lactoferrin on chemotherapy induced intestinal damage in rats 160

W. Jing, M.B. Strøm, J.S. Svendsen, and H.J. Vogel Biophysical studies of the interaction of 15-residue lactoferricin B peptide analogs with model membranes 161

K. Ichimura, H. Kihara, and S. Matsuzaki Structural changes of lactoferrin and stability of lanthanide–Lf complexes 161

Y.-C. Yoo, H. Morita, D.-Y. Yu, T. Tanaka, and K. Shimazaki Bovine lactoferrin suppresses CD3-mediated T-cell activation in mice 162

J. Mazurier, C. Fillebeen, M.-M. Ruchoux, V. Mitchell, S. Vincent, M. Benaïssa, and A. Pierce Lactoferrin is synthesized in the human *substantia nigra* and is up-regulated by tumor necrosis factor alpha 162

D.J. Schibli and H.J. Vogel The structures and membrane interactions of lactoferricin B derived peptides 163

W.-S. Kim, H. Morita, T. Tanaka, H. Kumura, and K. Shimazaki Binding profiles of lactoferrin and other transferrin family proteins against *Bifidobacterium spp* 163

Y.A. Suzuki and B. Lönnerdal A lactoferrin receptor in Caco-2 cells and its expression in the baculovirus system 164

S. Baveye, E. Elass, C. Blanquart, M. Masson, J. Mazurier, and D. Legrand Molecular mechanisms of inhibition of neutrophil recruitment by lactoferrin 164

E. Elass, S. Baveye, D. Fernig, C. Blanquart, M. Masson, J. Mazurier, and D. Legrand Lactoferrin interacts with CD14s and inhibits the expression of endothelial adhesion molecules, induced by the CD14s–lipopolysaccharide complex 165

K. Otsuki, B. Lönnerdal, and M.P. Sherman Bacterial growth on human cervical epithelia: A new assay for testing killing by lactoferrin 165

J.H. Brockn, A. Roseanu, P. Prunescu, F. Chelu, C. Stoica, M. Moisei, M. Trif, and C. Prunescu Effect of free and liposome-entrapped lactoferrin on melanoma B16-F1 cells 166

D.D. Chapple, R. Hussain, L. Moriarty, C. Joannou, E. Odell, G. Siligardi, and R.W. Evans Structure function analysis of lactoferricin variants 166

Y.A. Suzuki and B. Lönnerdal Tissue distribution and embryonic expression of a lactoferrin receptor in the mouse 167

M. Yajima, M. Nakayama, Y. Aoyama, T. Yajima, K. Koide, and T. Kuwata Lactoferrin ameliorates severe albumin extravasations and neutrophilia in LPS injected neonatal rats 167

I. Imoto, M. Okuda, E. Miyashiro, M. Koike, K. Yamauchi, S. Teraguchi, H. Hayasawa, N. Toyoda, Y. Taguchi, S. Nakashima, M. Yamaguchi, M. Iwasa, J. Ikoma, M. Kaito, and Y. Adachi Effect of oral lactoferrin on volunteers with *Helicobacter pylori* infection 168

Number 2 / numéro 2

Jörg Schickel, Katharina Stahn, Klaus-Peter Zimmer, Ralf Sudbrak, Tim M. Størm, Matthias Dürst, Michael Kiehntopf, and Thomas Deufel Gene for integrin-associated protein (IAP, CD47): Physical mapping, genomic structure, and expression studies in skeletal muscle 169

M. Kapoor, C.A. Curle, S. Kalia, and Y. Achari Minimal promoter for the NAD^+-specific glutamate dehydrogenase gene of *Neurospora crassa* 177

Mahmoud Rouabhia and Noëlla Deslauriers Production and characterization of an in vitro engineered human oral mucosa 189

Christian Blouin, J. Guy Guillemette, and Carmichael J.A. Wallace Probing electrostatic interactions in cytochrome *c* using site-directed chemical modification 197

Hong-Wei Zhou, Yan Xu, and Hai-Meng Zhou Activity and conformational changes of horseradish peroxidase in trifluoroethanol 205

K.P.J. Hemalatha and D. Siva Prasad Purification, physicochemical properties, and subcellular location of alkaline inorganic pyrophosphatase from sesame (*Sesamum indicum* L.) cotyledons 215

Sanchita Hati, Sudeep Bhattacharyya, James V. Price, and Alan S. Tracey Comparative modeling of the phosphatase and kinase domains of protein tyrosine phosphatase and insulin receptor kinase from *Drosophila melanogaster* (DPTP61fm), and a computational study of their mutual interactions 225

Tamás Takács, Zoltán Rakonczay Jr., Ilona S. Varga, Béla Iványi, Yvette Mándi, Imre Boros, and János Lonovics Comparative effects of water immersion pretreatment on three different acute pancreatitis models in rats 241

Mark A. Deeg and Rosario F. Bowen Phosphorylation decreases trypsin activation and apolipoprotein AI binding to glycosylphosphatidylinositol-specific phospholipase D 253

Giorgio Mangiarotti and Roberto Giorda Synthesis of ribosomal proteins in developing *Dictyostelium discoideum* cells is controlled by the methylation of proteins S24 and S31 261

NOTE

Linda S.M. Ooi, Fang Liu, Vincent E.C. Ooi, T.B. Ng, and M.C. Fung Gene expression of immunomodulatory cytokines induced by *Narcissus tazetta* lectin in the mouse 271
